Vendor:Cisco

Exam Code:210-451

Exam Name:Understanding Cisco Cloud
Fundamentals

Version:Demo

QUESTION 1

Which two options are benefits of the Cisco InterCloud Solution? (Choose two.)

- A. enforces standardization on a single hypervisor product
- B. provides self service for hybrid resources
- C. management of heterogeneous SAN solutions
- D. secure connectivity between public and private Clouds

Correct Answer: BD

QUESTION 2

Which of the following statements is false?

- A. VM high availability enables the restarting of virtual machines that were running on hosts that failed.
- B. Live migration is a disaster recovery feature that allows the migration of VMs after a physical server suffers a major hardware failure.
- C. Resource load balancing allows automatic host selection when you are creating a virtual machine.
- D. VM fault tolerance reserves double the resources a virtual machine requires.

Correct Answer: B

QUESTION 3

Which best describes a SaaS Cloud model?

- A. infrastructure that presents the user with an operating system allowing programming language execution environment for testing database and web servers
- B. infrastructure that virtualizes server functions on a hypervisor
- C. infrastructure that provides elastic storage and computing resources
- D. a platform that provides access to application software or database resources

Correct Answer: D

QUESTION 4

The Cisco InterCloud Fabric Director provides what functionality?

- A. It is the single point of management and consumption for hybrid Cloud solutions.

- B. It is the single point of management and consumption for public Cloud solutions.
- C. It is the single point of management and consumption for private Cloud solutions.
- D. It is a plugin of a Virtual Machine Manager to provide management and configuration for hybrid Cloud solutions.

Correct Answer: A

QUESTION 5

Cisco APICs utilize sharding to provide what function for an ACI fabric?

- A. It provides scalability and reliability to the data sets generated and processed by the Distributed Policy Repository, the endpoint registry, the Observer, and the Topology Manager
- B. It provides replication of application network policies across the APICs in the cluster
- C. It provides a method for determining which APIC will act as the master in a fabric during the election process
- D. It provides horizontal scaling ability for policy management on APICs

Correct Answer: A

QUESTION 6

Which of the following most accurately describes the default role of Server Equipment Administrator in UCSM?

- A. Read and write access to physical server related operations. Read access to the rest of the system.
- B. Read and write access to logical and physical server related operations. Read and write access to the rest of the system.
- C. Read and write access to logical and physical server related operations. Read access to the rest of the system.
- D. Read and write access to physical server related operations. Read and write access to the rest of the system.

Correct Answer: A

QUESTION 7

An engineer is running a lab environment on a local PC and wants to simulate a production ESXi environment. Which type of virtualization technology can the engineer deploy on the machine without compromising the ability to use the operating system on the local machine?

- A. Type 2 hypervisor
- B. Type 1 hypervisor
- C. desktop mobility
- D. horizon view

Correct Answer: A

QUESTION 8

What best describes the live migration of a virtual machine from one host to another?

- A. It requires shutting down the virtual machine before migration
- B. It requires that the I/O and CPU calls be quiesced to ensure that as the CPU and memory state of a VM is able to be transferred between hosts without interruption of services
- C. It requires that the filesystem of the virtual machine be migrated to the new host before the state can be
- D. The virtual machine will be unavailable for a few seconds while it is suspended, transferred and then reinstated

Correct Answer: B

QUESTION 9

Which best describes a Cloud deployment model that relies on interoperability between Cloud providers?

- A. Hybrid Cloud
- B. Multi-Cloud
- C. InterCloud
- D. Community Cloud

Correct Answer: C

QUESTION 10

Which of the following features enables cloud computing pooling characteristics?

- A. Fault tolerance
- B. Live migration
- C. High availability
- D. Resource load balancing

Correct Answer: D

QUESTION 11

A company wants to take advantage of the latest virtualization technologies while still ensuring high levels of security, privacy, corporate control, and management visibility. Which cloud deployment model meets these requirements?

- A. hybrid
- B. private
- C. public
- D. community

Correct Answer: A

QUESTION 12

What two protocols does a physical switch and Nexus 1000V support? (Choose two.)

- A. MPLS
- B. STP
- C. ARP
- D. CDP

Correct Answer: CD
